

YOUR MEDICINES MATTER

A medication review with your pharmacist can help you:

- Understand what each medicine is for
- Make sure your medicines are working safely together
- Feel more confident about your health

WHY SHOULD I HAVE MY MEDICINES REVIEWED?

Even helpful medicines can cause problems if they do not work well together, are hard to keep track of, or no longer fit your medical needs.

Your pharmacist can help you with your medicines, answer your questions, and help you better understand your health.
